

Fertilizer Operators

**Certified
Green™**

Compacting ground with hard tyres is bad practice at any time. But when you're paid to spread a product to encourage growth?? Not only is it bad for your customer, it costs you directly too.

AIR CTI is leading the way in proven cost savings, and has been for decades. Ring Chet or Andrew On 03 5127 6128 NOW To find out how they can help your business.

11R duals at 100psi

11R duals @ 30 psi
957 sq. cm

Floatation tyre @ 40 psi
812 sq cm

High pressure damages more and deeper

40 psi

100 psi

High Floatation tyres do not make much difference unless tyre pressures are lowered. Lowering tyre pressures will lower compaction.

Getting Bogged can ruin your week. 6x6 and 4x4 trucks are costly to run, ride rough, and sacrifice carrying capacity. AIR CTI will double traction in many conditions letting a simpler, cheaper truck do the job. And if you really need 4x4 or 6x6, you really need AIR CTI. After all, why did you buy the truck? For traction, and if you need traction, you need AIR CTI.

AIR CTI is a tool, a very valuable tool, that lets you spread on more days, more comfortably, and quicker. It's kinder to your truck, the driver, and your customer.

To get good tyre life, you need hi-way pressures. To get good traction, good ride, and minimal compaction, you need low tyre pressures.

- By adjusting your tyre pressure*
- Traction improves 30-100%
 - Floatation improves
 - Tyre life improves 30-100%
 - Handles better
 - Rides better up to 900%
 - Stops better
 - Reduces maintenance
 - Reduces breakage
 - Reduces driver stress
 - Increases drive train life
 - Saves money
 - Increases driver control
 - Is Farm Friendly

AIR CTI for Fertilizer Spreaders

Snizentites

World's Shortest & most robust Rotators

- **INCREASE Paddock SPEED
- **LONGER TYRE LIFE
- **USES LESS FUEL
- **REDUCE SOIL COMPACTION
- **REDUCE RUTTING & BOGGING

All electronic components are safely built into a sturdy compact box, which is easily mounted inside the cabin, away from corrosive contamination.

AIR CTI's Exclusive Isolator stops unwanted air transfer, making your vehicle more stable on side hills.

Invented, designed and manufactured, Aussie Tough, for Tough Aussies

Only AIR CTI has These Features
